**Comedian, by Maurizio Cattelan**  
**Sold at Miami Art Basel for 120.000 USD.**

*“We are very conscious of the fragrant absurdity of Comedian. It is a piece of a low-cost expirable product and some inches of tape. But when we saw the debate it provoked in society and how it challenged the meaning of art, we knew that it was a risk worth taking, because the banana of Cattelan will become part of the history of art”*

Contemporary art begins in the 60s, marked in the year 1970 with the birth of the term Postmodernism and it reaches our days and the ones yet to come.

It takes place at the same time as our existence. It is the art of the present, the current art usually the one carried out by living artists.

# The Language of Contemporary Art

## IT BREAKS WITH TRADITIONAL IDEALS.

It is the result of a historical influence over the present times.

There are no barriers; no limits. There is an infinity of materials and sensations to explore.

It combines different techniques within the same artwork.

Theme: anything related to current times.

New forms of artistic creation.

# CONCEPTUAL ART

The one that values the conception of the work over the realization of it. Giving more importance to the idea of the artist rather than its realization.

That is, the art resides in the idea.
